

164th International Training Programme on Use of Data Analytics & Emerging Technologies in Audit

19th August to 04th September 2025

Course on Use of Data Analytics & Emerging Technologies in Audit

Technology is rapidly evolving into a key decision-making tool by enabling the analysis of vast data sets for actionable insights. Advanced analytics help identify risks and anomalies, making it essential for public auditors to stay updated with emerging technologies like AI, ML, and Blockchain. Upgrading competencies in these areas will enhance audit effectiveness and lead to more insightful recommendations.

The course offers the following:

- Introduction to data analytics
- Data Analytics Tools like KNIME, Tableau, Power BI, and Python.
- Emerging Technologies: AI, ML, Blockchain, and their applications in auditing and governance.
- Case studies and best practices
- Online certification in Data Analytics.

Programme Eligibility

- Senior and middle level officers with atleast 3 years experience in their respective SAI/Department/Ministry
- Experience in audit preferably in Data Analytics & IS Audit
- Age between 25 to 45 years

What is so fascinating about the course

- Careful and creative content design
- Strategic selection of faculty from wide and diverse group representing officers from SAI, India, academicians from institutes of international reputation, expert professionals in the relevant fields, global organizations etc.
- Our programmes are informative, engaging and aspirational.

Highlights of Delivery of Course Module

- Focus on emerging trends & international best practices
- Hands-on-sessions
- Case Studies & Group Works
- Country Papers and Theme Country Day
- Study Tours and field visits
